IN THE CLAIMS

Please amend the claims as follows:

Claims 1-6 (Canceled)

Claim 7 (Currently Amended): A method for detecting one or more eating disorders

selected from the group consisting of anorexia nervosa and bulimia nervosa which comprises

measuring the concentration of brain-derived neurotrophic factor (BDNF) or BDNF in blood

in a human subject, wherein a decrease concentration of BDNF in the blood of said subject

compared to the BDNF level in a normal control subject is indicative of anorexia nervosa or

bulimia nervosa.

Claim 8 (Currently Amended): The method according to claim 7, which comprises

measuring the concentration of brain-derived neurotrophic factor (BDNF) or BDNF with an

antibody against brain-derived neurotrophic factor.

Claim 9 (Currently Amended): The method according to claim 7, which comprises

measuring the concentration of brain-derived neurotrophic factor (BDNF) or BDNF with an

antibody directed against brain-derived neurotrophic factor and a labeled antibody directed

against brain-derived neurotrophic factor.

Claims 10-13 (Canceled)

Claim 14 (Currently Amended): A method for detecting one or more eating disorders

selected from the group consisting of anorexia nervosa and bulimia nervosa comprising:

2

detecting the concentration of brain-derived neurotrophic factor (BDNF) or BDNF in the blood or serum of a human subject, wherein a lower level of BDNF in the blood or serum of said subject compared to that in the blood or serum of a normal control subject is indicative of anorexia nervosa or bulimia nervosa.

Claim 15 (Previously Presented): The method of claim 14, wherein said subject is a female.

Claim 16 (Previously Presented): The method of claim 14, wherein said subject is a pubescent or adolescent female.

Claim 17 (Currently Amended): The method of claim 14, wherein said subject disorder is tested for anorexia nervosa.

Claim 18 (Currently Amended): The method of claim 14, wherein said subject disorder is tested for bulimia nervosa.

Claim 19 (Previously Presented): The method of claim 14, which uses a sandwich ELISA and a BDNF specific antibody to detect BDNF levels.

Claim 20 (Cancelled)
